Hey, Jim

I've been playing your album all week now. I've made love to it, slept to it, driven to it and worked to it....Yow...It's classic.

Our star system? Four is the max....I've only given it three other times in two years: Nine Inch Nails, Pearl Jam, Alejandro Escovedo...and if i was reviewing it, would have added Macy Gray...

I've been kicking myself though, over having to rush the review last week. I've been thinking of things I'd add, particularly if you want to use any for your promo package...here's one:::

Instrumental albums don't have to be about guitar wonks showing off their virtuosity. Jim Thomas plays with a fiery inspiration that smolders on every song.

This is a work of passionate intensity and beauty that could be the soundtrack to one of Jimi Hendrix's psychedelic dreams. Hendrix would be proud of the way his student has evoked his spirit, without lifting his style.

I've gotten some nice mail too from your fans..I'll try to forward it...

best

brad
